

Title :Software Engineer - Associate

Security Level :TS/SCI

Location :Annapolis Junction, MD

Description: WaveStrike is looking for Associate Software Engineers for several contract vehicles we support. We are looking for dedicated, hard working, team-oriented, engineers willing to learn from senior engineers. Shall have a minimum of two (2) years experience in the development, engineering, interfacing, integration, and testing of complex hardware/software systems to include requirements elicitation, analysis and functional allocation, conducting systems requirements reviews, developing concepts of operation and interface standards, and performing technical/non-technical assessment as well as end-to-end flow analysis.

Desired Skills: A Bachelors Degree in Computer Science or related field.

Required Skills: The individual must be able to accept directions and work independently on tasking. Have experience in developing documentation required to support a programs technical requirements. Have experience developing solutions, integrating and extending COTS products.
